FOR IMMEDIATE RELEASE

**Kanbo International Announces Global Marketing Launch,
Innovative Production Capabilities**

Oakbrook Terrace, IL. – July 12, 2015– Kanbo International, a globally based sucralose manufacturer, announced its plans to market high value, premium quality sucralose to North and South American food ingredient distributors and food and beverage consumer packaged goods companies. The company’s international headquarters opened this spring in Oak Brook Terrace, Illinois, a suburb of Chicago.

“Our focus is to leverage our proprietary production process to provide customers with high quality sucralose, exemplary service and value-driven pricing,” said Fernando Gonzalez, Vice President, Kanbo International. “Using our improved crystal formation technology, Kanbo Sucralose’s process is more efficient and results in a consistently high purity sweetener”.

According to recent market data, sucralose sweetened product launches continued to rise globally due to its clean, sweet taste and versatility. With a 3000 metric ton capacity expansion to be completed in mid-2015, the plant utilizes technology created through a partnership with Nanjing University and can meet the demand for sucralose in both granular and powdered form. This expansion will create the largest sucralose facility in China.

“The name Kanbo means healthy treasures”, Gonzalez said. “We want to be known in the industry for high quality sucralose, outstanding service and reliability – a treasure for food and beverage manufacturers worldwide.” Kanbo Sucralose will be exhibiting at the International Food Technology Tradeshow at the McCormick Place South, Booth 2677, Chicago, IL July 11 – 14, 2015.
